

Draft agenda Plan Side event 2024

What does cross-cutting non-technological topics mean for energy research, development and innovation, and for the CETPartnership

When: 13 November 2024,

Location: Apáczai Csere János street 9, Budapest Hungary

Open event: The event is open

Registration: [SET Plan Side event | Clean Energy Transition Partnership \(b2match.com\)](https://b2match.com)

Target groups: industry associations, the research community, energy research policy makers, SET Plan steering group members and IWG/ETIP officials.

The Clean Energy Transition Partnership is a multilateral and strategic partnership of national and regional research, development and innovation (RDI) programmes in European member states, associated and other countries.

The revised SET Plan has clearly identified the need to address cross cutting issues to accelerate the deployment of clean and efficient energy technologies. What is the Clean Energy Transition Partnership already contributing, and how can we all align on these issues, also considering the clear link between the SET Plan Task Forces on cross-cutting areas and the Clean Energy Transition Partnership. The Clean Energy Transition Partnership invites relevant experts to a lively discussion of these issues. Join us in this session.

During this Side event we want to engage the SET Plan community in a discussion on what cross-cutting non-technological topics mean for energy research, development and innovation, and for the CETPartnership. We also want to receive input for how the CETPartnership should address the cross-cutting areas of our [SRIA](#), in the CETPartnership Joint Call 2025 and other activities.

For **questions**, please address coordination@cetpartnership.eu

Draft Agenda 14-16h

Moderation: Kristina Starborg, Co-coordinator of the CETPartnership

Time	Topic	Speaker(s) TBC
	SETTING THE SCENE	
14.00-14.05	Welcome, introduction	Kristina Starborg, Co-coordinator of the CETPartnership
