

Co-creation “Regional Value Chains” of the ERA-Net SES Knowledge Community

May 24 -May 25, 2018, Quality Hotel View Hyllie, Stationstorg 29, 215 32 Malmö

The Workshop will dive into the topic of regional energy systems and regional value chains. After an introduction on the topic, current needs of and barriers for the implementation of sustainable, regional energy systems and regional energy value chains will be discussed in moderated co-creation sessions. The groups will be composed of solution developers and stakeholders, so-called “need owners”, so that the most important questions for RDI can be brought together and solutions can be fitted to existing needs. For this reason, the meeting is also very interesting to potential project applicants desiring to proof their project ideas against real needs.

The one and a half-day meeting will bring together ERA-Net SES projects, experts from research, business and industry, as well as stakeholders in the field of regional energy systems like Regional development agencies, business development institutions, representatives from regions and municipalities as well as funding partners from funding programmes and investors.

A new ERA-Net SES Working Group on this specific topic will be founded to complement the existing Working Groups on System Architecture and Implementation Modelling, Storage and Cross Energy Carrier Synergies, Regulatory and Market Development, Consumer and Citizen Involvement, Interoperability and Standardisation. Overlaps and interfaces between the working groups will be discussed. At the end of the meeting the Working Groups will develop their topics for this year’s spotlights and policy brief taking into account the results of the sessions from the first day.

Agenda of the Knowledge Community Meeting and Co-Creation “Regional Value Chains”

When?	What?	
MAY 24	08:30-09:00	Registration
	09:00-10:00	Welcome & introduction to topic “Regional Value Chains”
	10:00-12:00	Co-creation session on needs and existing gaps in the area of Regional Energy Systems from the perspective of the different Working Groups
	12:00-13:00	Lunch
	13:00-15:00	Continuation of co-creation session
	15:00-17:00	Founding of new Working Group on “Regional Value Chains” and development of related Living document questions Reports from existing ERA-Net SES KC Working Groups
MAY 25	08:30-09:00	Registration
	09:00-12:30	Development of topics for spotlights and policy briefs from Knowledge Community Working Groups
	12:30	End of event

Please be aware that you have to register for this event on the ERA-Net Smart Energy System event page ([here](#)).
