Kick-off Webinar Joint Call 2020 Projects

We welcome our new project!

Peer-to-Peer Feedback Sessions in June

We started our series of 5 exciting peer-to-peer feedback sessions!

JPP ERA-Net SES during EU Sustainable Energy Week

Together with DG ENERGY (European Commission), Auvergne-Rhône-Alpes Energy Environment Agency and Energijos Skirstymo Operatorius (ESO) Lithuania, we will organise a policy session on 27 September as part of the European Sustainable Energy Week (EUSEW) Policy Conference. With the title "The power of Digital Innovation Hubs to accelerate the digitalization of Europe's energy transition", we will discuss and unveil potentials of Local Energy Systems to accelerate the digitalization of Europe's energy transition.

Podcast

Our new episode "[How to regulate Green Hydrogen?](#)" is available now.

Listen to the last episode of the Clean Energy Transition Podcast "How to regulate Green Hydrogen?". The guests in this episode are Tara Amirkhizi and Rasmus Pedersen from Technical University of Denmark. In this episode we learn about green Hydrogen and the obstacles connected with it. The experts also analyse the role of gas in the energy system.

Kick-off webinar Joint Call 2020 projects

Together with Mission Innovation we welcome our new projects and their project partners / project consortia. Their project journey kicked-off with a special webinar!

Together with them, we started the JPP ERA-Net SES Focus Initiative #EnerDigit (Digitalisation of the Energy System). EnerDigit - A joint programming initiative to establish transnational innovation eco-systems for the designing, implementing, and testing of interoperable technical and business services for energy systems, unleashing the potential of digital transformation for the energy transition. We are looking forward to the joint journey!

Peer-to-peer feedback sessions in June

We started this years' series of 5 exciting peer-to-peer feedback sessions. The peer-to-peer feedback sessions are the basis for intensive exchange on shared topics in the family of projects, allowing to dive deeper into the insights revealed in the annual reporting. Also, they provide a platform to discuss challenges and useful approaches with peers. Following sessions took place and are still to come in June 2022.

Energy Conversion Hubs		14 June 2022	9:00-12:15 CET
Market Energy Cells & Communities	Planning,	15 June 2022	9:00-12:15 CET
Power-to-X Flexibility	&	21 June 2022	9:00-12:15 CET
Sector Heating and Cooling & Buildings	coupling,	23 June 2022	9:00-12:30 CET
Electrical Storage & Electric Vehicles		28 June 2022	9:00-12:15 CET
